About Us

Tibah Land is one of the leading producers, processors and exporters of organic and conventional herbs, spices and essential oils.

Tibah Land has been established in 2017 after long years of owners' experience in that field in Egypt.

The company is engaged in preparing and exporting a wide range of organic and conventional herbs, spices and essential oils.

Each and every product is tested well on a variety of industrial and medical parameters to make sure that our customers' requirements are well fulfilled and keeping our reputation as a top priority.

The company has many subcontractors that own pure, clean and organic soil of 1000 hectares which were prepared and cultivated according to the EU organic regulations.

In order to meet customer satisfaction, reduce lead times, and supply all required cut sizes, the company has invested in a large developed processing facility.

Tibah Land team is highly skilled and has extensive experience working in organic exportation. They can respond to your inquiries and questions in the same day.

Tibah Land has applied for the EU, NOP organic certificates.

Tibah Land is ISO 9001, ISO 22000 and FDA certified.

Tibah Land packaging are food grade certified.

Tibah Land is applying HACCAP standards to ensure that all manufacturing activities are in compliance with HACCAP System and producing safe Hygienic and High Quality products, the company reaches the customers satisfaction through the high quality and competitive prices that the company offers.

Our concept is based on five Pillars that form our name:

- T**ransparency.
- I**ntegrity & Intelligence.
- The **B**est.
- A**ccuracy.
- H**onesty.

Our policy

Tibah Land is applying internal safety management standards to ensure that all manufacturing activities are in compliance with the international standards.

The company makes safe, hygienic, and high-quality products.

The company reaches its customers satisfaction by providing high-quality products at reasonable prices.

Our mission

Our products are crafted to connect as many people as possible to the beauty and purity of nature.

Our vision

We aim to build a truly sustainable organic value chain, working closely with our farmers and customers.

Our commitment to you

We are committed to secure the source of supply and control the whole process from seeding till exporting to provide high-quality products at reasonable prices.

Social responsibilities

As a social responsibility, we believe that creating a healthy, supportive and empowering environment for our farmers and workers is of no less importance than the quality we offer to our customers.

Instead of providing short-term aids and support for the people in need within our community, we are taking part in long-term projects that improve people lifestyle.

Environment sustainability

We are responsibly managing the natural resources so they will be still available in the future.
How to farm sustainably through crop rotation, we are working without damaging the soil quality of our farm.

Regenerate ecosystems and preserve biodiversity.

Become carbon-neutral and proactively adapt to climate change.

Quality

Quality comes first!

The top priority in our business is ensuring our products quality.

We pass each product under various level of quality control.

We control the whole process from seeding till exporting.

Analyses

We test our products for Pesticides, Microbiology, PATA, ETO, Glyphosate, DNOC, Heavy metals, Perchlorate, oil content and Aflatoxin.
